# 2025 HERDSMAN'S BEST MAINTAINED TEAM COMPETITION

1 <sup>st</sup>	YANCO AGRICULTURAL HIGH SCHOOL
2 <sup>nd</sup>	CALROSSY ANGLICAN SCHOOL
3 <sup>rd</sup>	FRENSHAM
Highly Commended	THE KING'S SCHOOL

## *Notes from Mr Alastair Rayner, Chief Steward*

*Each year we try and improve the competition, build on what we have done before and where possible provide additional information for the Exhibitors.*

*This year, in addition to the normal live scanning, abattoir slaughter floor data, chiller assessment data and competition scores, we also collected images of every carcass using the MEQ Camera's. Access to these images will be provided to all Exhibitors in the next couple of days through a link that we will share by email.*

*The additional data also allowed us to cross check between the data sets and the images to be confident the scores for each trait and carcass were appropriate. Where possible we did this using multiple data points. Carcass graders, MEQ camera operators and RAS Stewards viewed all carcasses. We cross checked data and images for carcasses from each of the three plants used to process the cattle.*

*Specifically, we cross checked any EMA's that were 15% different to scans and found carcass results to be more accurate. While rib fat is not used in any of the calculations, we cross checked any significant anomalies in rib fat between the live scan and carcass data.*

*A more up to date saleable meat yield calculation was used. This calculation does not include rib fat.*

*You may notice the MSA Index values are a little lower than you may have expected. For the show process to qualify for MSA grading, with animals coming from multiple vendors the showground is approved the same as a saleyard MSA pathway. This means there is a 5 point deduction on the MSA index for all animals.*

*We will continue to review the competition and the information we provide.*
